Aim:
To create a simple cloud software application for property building & rental process using cloud service providers to demonstrate SANS.

Procedure:

1) go to zoho.com

2) login

3) create solution

4) select Application

5) create a new application

6) select a form or create your own form templet for property building & rental process using basic modules

7) created new software.

Results:

Property building & rental process application created to demonstrate Saos.
